As a dentist you are well trained to restore teeth or even place implants in a healthy occlusion; However....

Did you know that an unhealthy occlusion might be related to:

Fracturing Porcelain	Gingival Abrasions	Abnormal Bite Adjustments	Tooth Mobility
Fractured Cusps	Failing Implants or Bone Loss	Worn Dentition from Clenching/ Bruxing	
(Migraine) headaches	Snoring/Sleep Apnea		

Are you POSSIBLY restoring teeth or placing implants on patients that have an existing dysfunctional occlusal system or **Airway / Breathing Disorder** ?

- *Managing Restored Dentitions from Bruxism and Sleep Disorders are unique to each patient.
- *Constricted Airways can destroy beautiful teeth..... Function always rules over Cosmetics.
- *Learn How to Treat the Airway and Protect Teeth for Maximum longevity

DENTA4 education is the system to restoring dentitions..... (whether you need to alter occlusion or not and why)

The goal of the **Sleep Course** is to equip Doctors and "Key" team members How to Recognise, Examine and Treat a patient with limited signs/symptoms of TMJ/Sleep Disorders (Snoring/Sleep Apnea) providing maximum longevity of ANY prosthetics.

COURSE OBJECTIVES:

- *Review of Jaw Joint/Muscle Treatment protocol in Phase 1 treatment
- *Treatment protocols for the different diagnoses.....appliance vs. CPAP
- *Completing Phase 1 Orthotic Treatment to Maximum Medical Improvement
- * **Caution !! Learn How an Adapted CR Permanent Bite Change could be at RISK !!!**
- *How your practice needs to be BC College compliant with Dental Sleep Medicine.....the latest!!!
- *Sleep Physiology and Disorders within your patients
- *Clinical exam for Dental Sleep Medicine
- *How to take a proper Airway Bite and Choose the proper appliance for each unique treatment
- *Finding "Sleep" patients in your practice; the role of the hygienist
